## ABOUT

Braun Film and Video, Inc. is a full-service film, video and multi-media production firm, handling projects from script to screen. Our extensive background includes commercial and PSA productions, federal and state governments, private sector and commercial / corporate communications, training programs, television and radio broadcasting, non-profit and association programming, documentaries, media tours, web video, and more.

## APPROACH

We recognize that every client is unique with a unique story to tell. At Braun Film, we work collaboratively with our clients to understand their audiences, goals, call to action and the nuances of their messaging. It's through our understanding of these variables (and many others) that we can then make recommendations on best approaches for your project. Our creative flexibility means that we can customize your project to accurately reflect your organizational culture. Whether your program requires a straight-forward approach, or one that's more edgy, a serious tone or a humorous one – our goal is always the same – getting the client's message across through the most effective means possible.
